

Can I do an Online Check In?

Sergey Shevchenko - 2017-01-31 - General Information

What is online check-in?

Checking-in online is the process by which you can print your boarding pass at home so you can save queuing time at the airport. On arrival at the terminal, passengers who have already checked in online and printed their boarding passes only need to drop their baggage off in the appropriate area before proceeding to security controls. Online check-in is usually available 24 hours before scheduled departure time but may vary between airlines and we suggest you to check this directly on the airline's website. Low-cost airlines may allow check-in from 30 days before your departure. If you have any queries please check with your airline.

Why do I have more than one code for the online check-in?

In Sky-tours we use our technology to combine different flights offered by the airlines to give you the best prices. For this reason, your booking may have more than one confirmation code, but you will all fly in the same plane. You will be able to check in online if the airline offers this option. Please keep in mind that all passengers booked under the same booking reference are sharing the same code.

How do I do it?

You can only do the check in online at the airline's website. Just enter the confirmation number of the airline, which you can easily find in your itinerary or e-ticket, and your last name. Go through the check in steps and you will have your boarding pass ready!
